EHS Modular Suite Overview

UK Edition

Tired of juggling multiple systems? Bring everything together in one intuitive, simple-to-use platform.

Simplify the management of your EHSQ processes—from incident reporting and audits to compliance tracking and risk assessments.

HSI Donesafe is a cloud-based, integrated platform with real-time reporting, automated workflows, and configurable modules. Accessible from the front-line to the boardroom, make informed decisions using clear, actionable data — **all in one place.**

One simple-to-use platform.

Software should support your EHS efforts, not make them harder. And that's how HSI Donesafe is designed.

Easy Configuration

Software that adapts to you.

Simply configure the platform to suit your business and system needs using our intuitive interface. Drag, drop, done.

Integrated System

Complete connection.

All modules are linked and sync seamlessly with your existing systems, creating one system across all departments.

Effortless Actions

No more data delays.

Access workflows, automations and actions for proactive incident responses. Centralised, synchronised data enables real-time alerts and actions.

Future Proofed

Built for scale.

Tick all the tech boxes - security, resilience, admin controls, authentication, integrations and reporting. Designed to scale as business needs evolve.

How can one streamlined system improve your EHS management?

Multiple systems often create more work and unnecessary duplication.

By reducing the number of systems you'll simplify the complexity.

Manage Compliance

- Suite of configurable modules and reporting to support compliance efforts.

Manage Risk

- De-risk the workplace with proactive risk management.

- Incorporate risk frameworks into investigations and assessments.

- Actively manage risk with risk scoring, risk matrices, and robust risk controls.

Drive Productivity

- Drive workforce efficiencies with cloud-based EHS technology accessible anywhere, including offline environments.

- Seamless digital workflows eliminate clunky paper-based, manual spreadsheets and other cumbersome systems.

- Lower admin overheads with automation, reminders & follow-ups to drive task completion.

Centralise Processes

- Bring data collection and document management to a single centralised system.

- Streamline complex and disjointed workflows.

- Manage user profiles, actions, permissions & process controls in one place.

Improve Visibility

- Track, monitor, and gather insights using real-time dashboards & analytics.

- Make smarter decisions faster with data insights surfaced instantly via alerts and notifications.

- Run advanced reporting for deeper insights and data mining utilising business intelligence (BI) capabilities.

All the EHS modules you'll need.

With a wide range of modules, you can add on different modules as your business needs evolve.

Asset Management	Audit Management	Safety Alerts	Document Management	Critical Control Management	Build Your Own	Contracts	Vendor & Supplier Management	Quality & Supplier	Safety Meetings	Emergency Management
Attestations	Fleet Management	Checklists & Inspections	Visitor Management	Contractor Management	Infectious Disease Management	Investigations	Observations Management		Drug & Alcohol	PPE
Risk & Compliance	Non-Conformance (NCR)	Quality Management	Incident Management	Food Safety	Hazard Management	Risk Management	Projects	Asbestos	Warden Management	RAMS Management
	Obligations Management	Certification Management	Health & Monitoring Hygiene	Health & Safety	Ergonomics	Environmental & Sustainability	Learning Management	Customer Complaints	Permit to Work	Risk Assessments
		Corrective Actions					Chemical Management & SDS Management		Change Management	

Most Commonly Used Modules

The essential EHS modules are listed below.

Module	Description
Asset Management	**Manage all your assets under one place** Efficiently manage various assets in real-time by utilising QR codes to initiate activities like check-out, service requests, and inspections, configurable for diverse asset types such as PPE, tools, software, and fleet vehicles.
Audit Management	**Efficient audit management for streamlined compliance** Consolidate audit workflow and documentation into one system. Manage a universe of audits, scheduled, ad-hoc and linked to risk management registers and libraries.
Business Continuity	**Ensure business continuity with comprehensive management** Maintain operational resilience with dynamic Business Continuity Plans, Business Impact Analysis, dependency mapping, and real-time monitoring to mitigate disruptions and ensure seamless recovery.
Certification Management	**Efficiently track and manage worker certifications** Upload and track worker certifications along with relevant details such as expiration dates, issuing authority, and more to simplify compliance management.
Checklist & Inspections Management	**Effortlessly run any checklist and inspection anytime, anywhere** The checklist and inspection module enables customisable digital checklists for diverse safety and compliance needs, facilitating real-time risk identification and management.
Contractor Management	**Streamline contractor compliance and remote management** Efficiently manage contractor compliance, from registration to insurances and qualifications, ensuring all mandatory requirements are met. Features include remote management and contractor self-registration.
Permit to Work (PTW)	**Maximise Safety, Minimise Risk: Streamlined Permit to Work** Enhancing safety and compliance by managing permit to work (PTW) processes, ensuring contractor safety, and coordinating work activities to mitigate risks effectively.
Corrective Actions	**Streamline, prioritise, and automate corrective action** Efficiently centralise, prioritise, and automate corrective actions, linking to findings, setting SMART goals, and ensuring timely completion with automated escalation.
Document Management	**Centralised document control for efficient document management** Centralise storage and access to various documents, ensuring version control, approval processes, and tracking of user acknowledgments.
Drug & Alcohol	**Manage drug and alcohol testing effortlessly** Ensure site safety with drug and alcohol testing, featuring random testing, third-party management, result capture, causation tracking, and lab coordination.

Module	Description
Environmental	**Achieve environmental excellence** Utilise comprehensive tools for incident reporting, compliance tracking, audit management, sustainability monitoring, waste management, and risk assessment to enhance environmental responsibility.
Hazard Management	**Streamline hazard identification and corrective action** Efficiently capture and address worker-identified hazards with multimedia support. Automated workflows ensure stakeholder notification, risk assessment, and corrective action.
Incident Management	**Capture, manage and action every incident.** HSI Donesafe's Incident Management software enables thorough incident tracking, investigation, and corrective actions, supporting diverse methods in an intuitive platform.
Learning Management	**Streamline training management for enhanced workplace competency** Efficiently manage inductions competency, e-learning, and training. Includes requests, records, certifications, skills assessments, surveys, and course content.. Simplify training assignment and tracking.
Observations Management	**Effortlessly improve safety performance with streamlined observations** Efficiently capture and assess safety performance and behaviours with a user-friendly interface for seamless reporting and analysis.
Quality & Supplier	**Efficiently manage quality for compliance and efficiency** Streamline quality management for compliance and efficiency, tracking products, defects, feedback, and invoices in one centralised, resource-efficient system.
Risk Management	**Comprehensive risk management with seamless integration** Manage your organisation's entire risk cycle—from identification and assessment to reduction—using an automated, integrated framework that links with Incidents, Hazards, and Audit modules for a complete risk overview.
Safety Alerts	**Rapidly alert and educate your entire workforce** Distribute critical safety alerts and lessons across your organisation. Alerts integrate with emails, dashboards, and SMS, linking to attachments or external references.
RAMS Management	**Efficient RAMS management for enhanced workplace safety** Streamline the creation, approval, and tracking of Risk Assessment Method Statements (RAMS) to help maintain compliance and enhance workplace safety through effective risk management.
Vendor & Supplier Management	**Comprehensive vendor management for seamless supply operations** Manage vendor and supplier information comprehensively, including details like VAT, CRN, UTR, addresses, contacts, and performance tracking, integrating seamlessly with other modules.

Looking for more? We've got you covered.

Explore our comprehensive module range.

Module	Description
Asbestos	**Streamline asbestos management** Effortlessly manage asbestos compliance. Centralise asbestos data, inspections, abatement projects, compliance, and reporting for comprehensive management and regulatory adherence.
Change Management	**Streamline and secure your change management process** Manage all change processes within a secure, auditable environment, from initiation and assessment to approval and review, ensuring comprehensive tracking and compliance.
Continuous Improvement	**Optimise operations with strategic continuous improvement tracking** Enhance organisational efficiency with a continuous improvement module that tracks feedback and ideas, prioritises initiatives, and measures impacts across configurable categories, linking to key business objectives.
Customer Complaints	**Efficiently manage feedback, streamline operations, enhance responsiveness** Streamline customer feedback with tagging, manager review allocation, and logging interactions. Includes triage for follow-up into Incident or Change Management modules.
Emergency Management	**Centralise and ensure emergency preparedness and compliance** Streamline emergency management with a single module to track preparedness, manage drills, update training, and help maintain compliance with evacuation procedures for all personnel.
Ergonomics	**Optimise workspace for safety and productivity** Enhance workspace design and practices for ergonomic well-being and productivity. Assess risks, recommend improvements, and implement preventive measures for a safer workplace.
Food Safety	**Streamline food safety and compliance effortlessly** Streamline food safety management with checklists, audits, and compliance tracking for standards like HACCP and ISO 22000, ensuring all food handling protocols are met.

Module	Description
Attestations	**Efficiently manage risks and compliance attestations** Trigger attestations for compliance with obligations, licenses, and risks as part of our Governance, Risk, and Compliance suite. Customise areas like gifts and entertainment as needed.
Chemical & SDS Management	**Streamline chemical management, ensure GHS compliance** Effortlessly manage chemical inventory, SDS, and compliance. GHS compliant, track quantities, storage, manifests, risk assessments, and receive record expiry notifications.
Contracts	**Streamline EHS contract management efficiently** Manage all elements of the Contract Register, including strategic sourcing, contract and tender information, workflow approvals and sign-offs, renewal dates and associated reporting.
Critical Control Management	**Risk mitigate with proactive controls** The critical control module identifies, prioritises, and monitors safety measures, driving proactive risk mitigation and compliance adherence, fostering a safer work environment.
Fleet Management	**Optimise fleet management for safety and efficiency** Centralise fleet data for full visibility, receive service reminders, real-time incident alerts, and conduct inspections with ease to ensure vehicle safety.
Infectious Disease Management	**Track infectious diseases with customisable reporting** Customisable platform for tracking infectious diseases, including reporting, triage, and case management, with dashboards monitoring confirmed cases, suspected persons, and voluntary isolation.
Health & Monitoring Hygiene	**Optimise health & hygiene compliance effortlessly** Take control of your Health and Hygiene management with an end-to-end software solution. Health surveillance medicals, testing, vaccination registers, psychological safety, health records and more.

Module	Description
Insights Reporting	**Enhance insights, streamline reporting effortlessly** Streamline reporting and monitoring of KPIs, statistics, and data with customisable dashboards, drill-down features, and seamless integration across modules and external sources.
Risk Assessments	**Optimise Workplace Safety with Risk Assessments Management** Efficiently manage Job Safety Analysis (JSA), Job Hazard Analysis (JHA), and Job Safety Environmental Analysis (JSEA) to identify hazards, assess risks, and implement effective controls, ensuring a safer work environment
Non Conformance (NCR)	**Ensure quality and satisfaction with detailed tracking** Track non-conformance incidents with detailed investigations and corrective actions, ensuring quality and customer satisfaction across products or services.
Plant & Equipment	**Streamline compliance and maintenance with proactive alerts** Manage plant and equipment compliance seamlessly. Link to safety operations, conduct risk assessments, monitor service statuses, maintenance history, and set alerts for scheduled requirements.
Projects	**Comprehensive project oversight** Create projects to manage worker involvements, supervisors, SWMS, JSAs, safety hazards/incidents, and all other associated qualitative and quantitative data capture.
Visitor Management	**Enhance site safety with integrated visitor management** Streamline site safety with an integrated visitor management system. Log, track, and communicate with all visitors and contractors, collect essential information, and issue QR coded badges.

Module	Description
Investigations	**Streamlined EHS investigations end-to-end** Streamline EHS investigations with integrated tools for root cause analysis, enabling targeted corrective actions to prevent future incidents and enhance workplace safety.
Job Management	**Streamline job processes with customisable management tools** Streamline job management with customisable forms and templates, facilitating end-to-end ER/IR process handling and data retrieval in your preferred reporting format.
Obligations Management	**Aid compliance with ease and efficiency** Aid compliance with regulations, licenses, and permits by assigning owners, tracking corrective actions, and monitoring progress in real-time with a centralised dashboard.
PPE	**Optimise PPE management and compliance effortlessly** Efficiently manage PPE inventory, ensure legislative compliance, and automate maintenance and replacement schedules.
Safety Meetings	**Easily track, communicate, aid compliance** Facilitate effortless organisation and documentation of WHS toolbox meetings, safety committee gatherings, and one-to-one discussions, ensuring effective communication and compliance tracking.
Warden Management	**Elevate emergency preparedness** Efficiently oversee warden management lifecycle, from induction to retirement, including certifications, drills, PEEP creation, and associated corrective actions, ensuring comprehensive emergency preparedness.

Still can't find what you need? Simply build it.

With our easy-to-use module creator, you can quickly build, and integrate modules.

Unlock endless scalability and flexibility with HSI Donesafe's drag-and-drop tools. Anyone can create and integrate modules seamlessly - no coding needed.
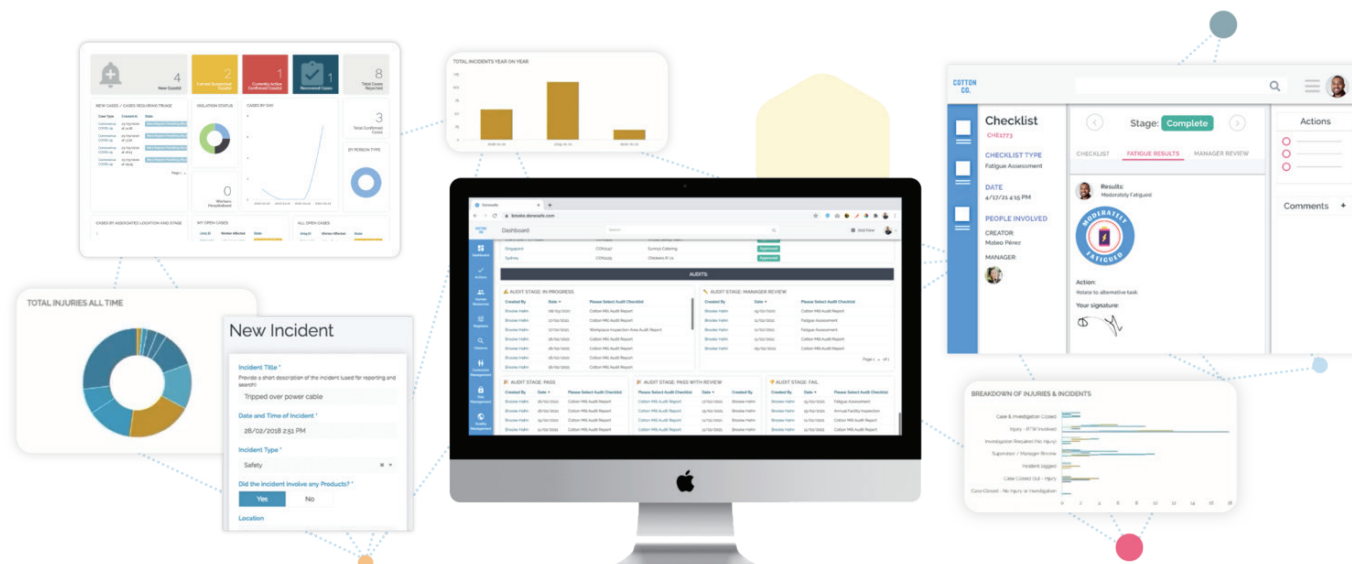

Need something customised?
Don't wait for a developer - simply make the changes you need and apply them instantly.

Need something more?
If you have a complex use case that we don't yet have a solution for, our team of experts can help you build it, quickly.

Thanks to our platform's adaptability, we're yet to find a use case we couldn't solve.

Frequently asked questions.

What modules are available within the HSI Donesafe suite?

HSI Donesafe offers a wide range of configurable modules, including Incident Management, Risk Management, Audit Management, Training Management, and Hazard Management. Additionally, users can create custom modules using a simple no-code environment, allowing for tailored solutions to meet specific business needs.

How easy is it to start with HSI Donesafe and grow over time?

HSI Donesafe's modular design lets you start with the modules you need and add more as you grow. This ensures seamless integration, with workflows, actions, and insights all working together, allowing you to scale at your own pace.

How configurable are the HSI Donesafe modules?

The modules are highly configurable, allowing users to tailor workflows, forms, and fields to meet their specific business needs and industry requirements.

Can HSI Donesafe cross-reference data between different modules?

Yes, HSI Donesafe offers powerful cross-referencing capabilities, allowing data from different modules to be linked and analysed for comprehensive insights.

How does HSI Donesafe integrate compliance and risk management?

HSI Donesafe integrates compliance and risk management by providing tools to identify, assess, and mitigate risks while ensuring compliance with relevant regulations and standards.

What are the benefits of unified workflows and actions in HSI Donesafe?

Unified workflows and actions streamline processes, reduce duplication of effort, and ensure consistent application of procedures across the organisation.

What reporting and dashboard capabilities does HSI Donesafe provide?

HSI Donesafe offers powerful reporting and dashboard capabilities, allowing you to generate, export, and analyse data through custom reports and real-time dashboards tailored to various roles. This provides key metrics and performance indicators for informed decision-making.

What are the benefits of HSI Donesafe's admin controls and centralised management?

HSI Donesafe offers robust admin controls and permissions, providing a single view and control of users, centralised actions, workflows, and data management. This streamlines operations, enhances security, and improves compliance, ensuring efficient and effective EHS management from one platform.

What are the benefits of centrally capturing all data on the HSI Donesafe platform?

Centralising data across all EHS modules on the HSI Donesafe platform allows for real-time actions, efficient management, and monitoring. This unified approach provides a single source of truth, enabling comprehensive insights and reports. It enhances decision-making, improves compliance, and streamlines operations by ensuring all EHS data is easily accessible and actionable from one place.
